

Case Study

VARIOUS CONSTRUCTION COMPANIES

AV INSTALLATION SUPPORT

Stock Image

Overview

Over the past few years, Phoenix AV has worked with a number of construction companies on a variety of projects. We have been campaigning hard to get construction companies to see AV Integrators as an integral part of the build process and consider us earlier rather than later.

Traditionally AV is left to the last moment after the build process and the building is handed over. However, modern systems and requirements for more aesthetically pleasing finishes means AV must be considered at the outset and proper planning carried out for areas such as wall strengthening for videowalls, in-wall and in-ceiling cable routes.

Getting it right can save wasted time, effort and money and allows for a smoother installation process.

PHOENIX STATUS

Supplier & Integrator

MAIN DATE RANGE

2005 - present

VALUE OF PROJECTS

£ 5,000 - £ 100,000
