Case Study

CITY ELECTRICAL FACTORS

AV CONSULTANCY REPORT

Main Presentation Room - Location for 86" Screen

Project Overview

City Electrical Factors were due to move into their new purpose built offices at Durham in October 2017.

Working with their architects, FaulknerBrowns, Phoenix AV were requested to put together an AV Consultancy Report and Costing for the new building.

There were to be 23 rooms and areas for review, consideration and equipping.

Unfortunately, due to various delays with the utilities for the build, the actual takeover and move did not take place until July 2018.

LOCATION

Durham, Newcastle

DATE

February - July 2017

PHOENIX STATUS

Accredited Suppliert

NET VALUE

£ 1,100.00

MAIN EQUIPMENT

- Report & Recommendations

Project Details

At the recommendation of FaulknerBrown Architects, CEF contracted Phoenix AV to prepare a fully featured report for the audio visual technology fit out of their new office complex.

The build included main reception area, prime presentation space, cafeteria and a further 20 meeting rooms, huddle and open presentation spaces.

Unfortunately, due to the issues with the main building project, the AV budget was constantly reduced and the original report recommendations had to be amended on a number of occasions.

Leaving the final decisions until relatively late, CEF finally selected a local supplier to implement the various Phoenix AV identified recommendations in July 2018 at approx £ 90,000.
